

Personal Introduction

I am a 25 years old professional with a combined bachelors and masters degree in Mathematics and Computing from Indian Institute of Technology Delhi, one of the most prestigious institutes in the country. I am currently working in the Data Science team at Adobe Systems. I have a broad set of interests in data visualization, machine learning, artificial intelligence, graph theory, topology and statistics.

As a side role, I also work with the WCA (World Cube Association) as a senior delegate of WCA for West Asia and a member of the WCA Quality Assurance Committee. The WCA is a body that conducts competitions for solving twisty puzzles like Rubik's Cube for speed. As a senior delegate, I am responsible for the growth of the organization in the region - by communicating and working with a lot of individuals and teams in various countries. You can visit my [WCA profile](#) for my personal records.

I got introduced to memory sports not so long ago and attended my first competition in September 2018 and got 17th place. I do hope to improve my results slowly over the coming years but personally, I find myself much more attracted to the part of making the memory sports community a better place for everyone. I believe my skillset makes me very appropriate for that role. Please refer to my cover letter for my detailed motivation and ambitions.
