

Born in 1979 in Munich, Germany. Discovered memory sports in 2005 and fell in love quite soon. It is a great sport. Was part of the founding group of the IAM in 2016 with so many others, we had the goal to bring something new to the sport that was missing before: That the athletes are appreciated, together with arbiters, organizers and helpers, and to give the memory community a voice. Have been a member of the Board since 2016. Was no easy job but very fulfilling. Together with my colleagues we established the first IAM world championships including a proper application process (WMC second edition to come soon), the new IAM world ranking with an average of best three results, got a European Championship cycle going, the new Images event (thanks to all the feedback!), the Level System (that took some time ...) and are establishing a network of national associations at the moment. And a few other things, like finally the first democratic elections.

To all people in the memory community I can only say: Of course I would be happy to get your vote, but the most important thing is to register and vote at all. Do it! :)
