

1. Do you have any concrete plans/ambitions on what you would like to accomplish during your mandate apart from serving on the board?

My aim is to take memory sports to the next level professionally. Whether it be through various sponsorships, media attention and broadcasting, as well as make the sport more entertaining and memorable (pardon the pun). I've been involved in memory sports since 2002 and there hasn't been many significant changes. It's about time our athletes deserved more recognition for their hard work, as well as everyone else involved. I've also been successful helping others here in Australia for many years to get involved in memory sports and helping them become successful ambassadors in their own right. I'm excited to work with others that have a passion for our sport and want to see it grow and I will use my time on the board to make this indeed happens.
